TECH STACK

Backend & API

ASP.NET Web API

C# | VB.NET

EF Core | SignalR

PHP (No Framework)

PHP REST APIs

Frontend

React TypeScript

React JavaScript

AngularJS

HTML5 | CSS3

JavaScript / jQuery

Database

MSSQL Server

SSMS | Oracle

EF Core / Dapper

3NF Design

Integrations

Oracle Fusion APIs

Airtable API

Twilio SMS

QR / Barcode

DDoS Protection

EDUCATION

BS Information Technology

East System Colleges of Rizal

Morong, Rizal · 2018 – 2022

Morong National High School

2011 – 2015

Tomas Claudio Memorial

Elementary School · 2005 – 2011

PROFILE

Innovative and resourceful Software Developer with a passion for backend development, database architecture, and system integration. Adept at crafting secure, scalable, and high-performance applications, implementing APIs, real-time workflows, and automated processes. Proficient in building PHP REST APIs from scratch without any framework. Strongly inclined towards backend and database-centric solutions, yet versatile enough to contribute across the full stack.

WORK EXPERIENCE

Web Developer

Feb 2025 – Present

ERGONS Project Marketing Consultant

- ▶ Leading back-end development and database management converting a legacy desktop system into a modern web application.
- ▶ Solely responsible for ASP.NET Web API (EF Core) development and MSSQL database design normalized to 3NF.
- ▶ Designed and executed complex SSMS migration scripts to unify scattered historical datasets.
- ▶ Developed front-end components using React TypeScript and real-time updates using SignalR.

Full-Stack Web Developer

Jun 2025 – Sep 2025

Freelance — Pigeon Racing Platform

- ▶ Built a web-based pigeon racing management platform covering race organization, registration, and result tracking.
- ▶ Designed scalable architecture handling multiple simultaneous races with secure authentication and data integrity.

Full-Stack Web Developer

Feb 2025 – Jun 2025

Freelance — SMS Platform

- ▶ Developed a Twilio-like web SMS platform with credit management, API integration, and DDoS protection.
- ▶ Designed secure payment system and external API enabling third-party applications to send SMS through the platform.

Web Developer

Apr 2023 – Feb 2025

Kamal Osman Jamjoom

- ▶ Modernized Oracle APEX application to ASP.NET Web API (EF Core) and AngularJS with Oracle Fusion API integration.
- ▶ Implemented shipment cost calculation, finance DB integration, and Airtable API sync for real-time order coordination.
- ▶ Built delivery tracking app with QR/barcode scanning, SMS notifications, and photo proof-of-delivery.
- ▶ Enhanced finance web application for shipment payment workflows with email notification alerts.

Customer Support Representative

Oct 2022 – Apr 2023

Alta Resources

- ▶ Provided customer support via calls, handling returns, refunds, and order inquiries professionally.
- ▶ Guided customers through the website and mobile app for placing orders, tracking shipments, and resolving issues.

Software Engineer

Jan 2018 – Dec 2022

Freelance — Early Career

- ▶ Developed Windows and macOS technician apps with secure login, credit-based usage, encryption, and anti-tampering safeguards.
- ▶ Built full-featured web applications and REST APIs from scratch using pure PHP, JavaScript, jQuery, and HTML — no frameworks.
- ▶ Created cross-platform diagnostic and proxy tools using Windows VPS for secure traffic inspection and monitoring.
- ▶ Implemented DDoS protection across all web applications, APIs, and network-based services.
